Tamil

Experience

DEC/2022 - Till Today

MTAP Technologies pvt. ltd.

Java Web Developer

Using java to develop employee transport system web application. Worked on new feature implementation and fixing the bugs of the existing product. Creating api calls for the features. Creating Jar files for web and app services. Doing code review for the other team members. Creating and maintaining the Data Base in MongoDB. Exposing the web services using JSON object and testing using POSTMAN. Coordinate with other teams like front-end and app to collect their requirement. Coordinate with devops team for server build deployments. Coordinate with CS team to check adhoc issues. Maintaining the documentation for team work distribution, review and deployment versions.

DEC/2021 - SEP/2022

Zoho Corporation private ltd

Member Technical Staff

Fixing the bugs in formula evaluation and value format conversion. Improved the efficiency in formulas like SumIf, CountIf, AverageIf, MinIf and MaxIf by reducing the execution time (16x faster) without disturbing the other features. Improved the efficiency in formulas like unique and duplicate by reducing the execution time (5x faster) without disturbing the other features. Improved the efficiency for deleting the rows operation by reducing the time (10x faster). Creating utility classes, interfaces and methods which are needed to improve the performance. Modify the existing methods to improve the performance without disturbing the existing flow. Analyzing the formula evaluation flow and time taken for the logic in each methods using logs and visualvm tool.

AUG/2021 - DEC/2021

3Di Systems

Java Web Developer

Using Java technologies to design and develop web application for client server environments. Add functionalities to existing applications under supervision. Developing view using JSP & JSTL tags. Configuring required technologies like Spring Boot, My SQL, Postman etc. Creating and maintaining the Data Base in My SQL. Creating and maintaining various layers in the project like Entity layer, Controller layer, Repository layer, Services layer etc. Exposing the web services using JSON object and testing using POSTMAN. Configuring Maven dependencies using pom.xml file. Integrating API's as per business requirement. Developed and executed JUNIT test cases for business layer. Use debugging skills to improve the quality of code and improve application performance. Attending daily meetings and collaborate to improve user experience.
